## Message from Worthy Vice Chancellor

**Prof. Dr. Muhammad Suleman Tahir**

I am very proud of what we are achieving at KFUEIT. We have invested in excellent facilities, hired outstanding academicians, and built enduring relationships with several national & international elite higher education institutions. Our faculty members are adept in their respective disciplines and are committed to excellence in teaching and innovative research. KFUEIT aspires for excellence in engineering, sciences and information technology. It is an endeavor to create a leading research university that offers quality education, research, and entrepreneurial skills to students. I believe in internationalization. Our slogan is, "Think globally and act locally." Even though we are a new university, we are ranked 9th in Pakistan in the International GreenMetric ranking. We also have a deeply embedded culture of continuous improvement for innovation and have always worked hard at getting excellence in every subject. I always encourage academic-industry linkages and also promote community services. In alliance with this vision, KFUEIT aims to produce outstanding graduates with skills to solve industry problems and support the community. I am delighted to say that we are very committed to the idea of sustainability and optimization. We are concerned with building the future of the nation through education and research. At KFUEIT, we are passionate about nurturing the untapped talents of students and revealing their full potential. Universities are the indicator of socioeconomic development in any region. It is an honor for me to work for KFUEIT.

## Vision

To become a world-class University that contributes significantly to the development of regional economy and uplift of local community by becoming a power house of intellectual and human capital generation.

## Mission

1. To offer an educational experience wherein:
  - (a) The curriculum and its delivery conform to international standards
  - (b) The students are provided an environment for wholesome development of their personality and creative potential
  - (c) The graduates produced are most sought after by prospective employers
2. To conduct research to solve local and national problems requiring knowledge based solutions

## Goals & Objectives

- Quality research & education for knowledge creation
- Skills development
- Innovation
- Governance through 100% merit implementation
- Community services
- Industrial linkage
- Preparing future leaders in Engineering, IT, Science and Social Science
- Technology development & entrepreneurship
- Power storage & management
