Vice Chancellor's Message

Prof. Dr. Muhammad Suleman Tahir

I am very proud of what we are achieving at KFUEIT. We have invested in excellent facilities, hired outstanding academicians, and built enduring relationships with several national & international elite higher education institutions. Our faculty members are adept in their respective disciplines and are committed to excellence in teaching and innovative research. KFUEIT aspires for excellence in engineering, sciences and information technology. It is an endeavor to create a leading research university that offers quality education, research, and entrepreneurial skills to students. I believe in internationalization. Our slogan is, "Think globally and act locally." Even though we are a new university, we are ranked 9th in Pakistan in the International GreenMetric ranking. We also have a deeply embedded culture of continuous improvement for innovation and have always worked hard at getting excellence in every subject. I always encourage academic-industry linkages and also promote community services. In alliance with this vision, KFUEIT aims to produce outstanding graduates with skills to solve industry problems and support the community. I am delighted to say that we are very committed to the idea of sustainability and optimization. We are building the future of the nation through education and research. At KFUEIT, we are passionate about nurturing the untapped talents of students and revealing their full potential. Universities are the indicator of socioeconomic development in any region. It is an honor for me to lead KFUEIT.

KFUEIT – A Journey from 2019 to 2022

We are living in a globalized world. No doubt, it is challenging to align higher education with the changing socio-economic conditions of the country. It is the need of the hour to equip the youth with valuable skills which are compatible with the market and industry. It is necessary for universities in Pakistan to do out-of-box thinking to meet modern challenges. In Pakistan, the role of universities in Pakistan is changing day by day. Now, universities are not just higher education institutions. It is one of the core responsibilities of the university to develop a research-friendly environment to properly address the agriculture, industry and social problems of the vicinity. Universities must develop good linkages with the industry and community. It is difficult to turn youth into success stories without the development of a vibrant educational, research-oriented, innovative and healthy environment in universities. New universities in the country have the potential to develop such a vibrant structure to meet the modern challenges in higher education.

Khwaja Fareed University of Engineering and Information Technology, located in extreme south Punjab, is a hope to change the socio-economic condition of the region. It is one of the leading universities in Pakistan which has adopted the modern university model and its management has evolved new strategies to meet the challenges in higher education and to develop a good educational, research-oriented, innovative and healthy environment for the students. Two and half years before Prof. Dr. Muhammad Suleman Tahir took charge of KFUEIT as Vice Chancellor. In a short period, under his leadership, it has become one of the rapidly growing universities in Punjab. It is fully aligned with the educational vision of Prime Minister Shahbaz Sharif and the Government of Punjab.

In two years, the number of students became almost doubled. More than thirty new BS, MS, and PhD programs were initiated. To facilitate online education, university open courseware was implemented which contains learning material for all courses for students. To enhance the exposure of the students and for improved learning, guest lecturers of professors from foreign universities were arranged in the majority of classes. To improve classroom teaching, a variety of faculty training workshops were organized in collaboration with PHEC. Under PC I Phase II, eight development projects and twelve development projects from the university's resources were initiated. These development projects include five faculty hostels, three boys' hostels, two girls' hostels, a community center, executive club, guest house, market, wastewater treatment, shed for buses, etc. University service statutes were approved and implemented in April 2021.

The process of recruitment of candidates was initiated in accordance with service statutes. In 2020, University improved its position on the UI International GreenMetric ranking chart by 186 positions. In 2021, KFUEIT secured 1st rank among engineering and public sector universities in Pakistan in UI International GreenMetric Ranking. It got 6th rank nationwide and 234th rank worldwide with the improvement of 94 positions in UI International GreenMetric Ranking. Similarly, KFUEIT got 5th rank countrywide and 378th rank globally in the 'Environmental Science' category which is much better than other universities in Punjab and Pakistan. Similarly, KFUEIT got 8th rank in Food Science Category and stands 3rd in UETs countrywide. And International TIMES Higher Education Impact ranking (2022) declared KFUEIT among the top 200 to 300 universities worldwide and the top 10 nationwide. KFUEIT Secured first position among Engineering Universities in the 'Affordable and Clean Energy' category. An increase of 114 percent in the number of students getting scholarships and a 2500 percent increase in scholarship amount was recorded. A University endowment fund was established. Seven thousand new books were included in the library. A new cafeteria was established. The University fitness gym was opened for students and faculty. Twelve new buses were included in the transport fleet. The fee for different undergraduate and graduate programs was reduced by 15 to 25 percent. Research publications were increased by 153 percent. 2050 percent increase in research project submission for different research grants was observed and as a result, KFUEIT won research grants of 458 million rupees. To improve the co-curricular and extra-curricular eighteen new student societies were initiated. KFUEIT students participated in different national competitions and got distinctions. Students of KFUEIT participated in 'One Day STEM & IT Innovations Expo 2021' organized by 'Pakistan Scientific and Technological Information Center (PASTIC)'. KFUEIT got the first position among more than forty-two universities and industries which were participated in the national event.

Business Incubation Center was established. The first business expo was organized in 2021 in which students presented their business ideas and the winners were awarded seed money for their business startups. It is an effort to promote the culture of entrepreneurship. University's first research journal and e-Magazine 'Baat' was initiated. To provide students with all services at one window and to save their time 'Student Facilitation Center' was established. A bank branch was established on the campus. More than fifty thousand plants were planted on the campus. All research labs were upgraded under different annual development schemes. South Punjab Skill Development Institute was established in collaboration with NAVTTC. More than six hundred students are enrolled in different certificate courses. The directorate of sports was established and proper coaching of the athletes was initiated. KFUEIT athletes participated in different national events and won more than sixty medals. Indeed, it is a big achievement in a short time from zero to success. Last Year KFUEIT sports team participated in Kamyab Jawan Sports Drive 2021 and won medals in different competitions. A Daycare center and Directorate of academics were established.

To improve research and collaboration more than 55 MoUs were signed with different national & international universities or organizations. KFUEIT and International Management Institute (IWMI) Pakistan inked an MoU to establish a collaborative relationship in promoting policies and strategies for sustainable, gender-inclusive, and equitable adaptation of climate-smart irrigation and water management practices leading to improve the livelihoods of poor and marginalized farmers in the Indus basin. Both organizations are already working together on solar-based precision irrigation under Solar Irrigation for Agricultural Resilience in South Asia (SoLAR-SA). A policy to improve financial discipline and implement austerity measures was formulated and as a result, the university got financial stability in 2021 first surplus budget of the university was approved. The research scholars at KFUEIT prepared a variety of consumer products in its labs which are ready for marketing. KFUEIT initiated different community development services like 'Aftaar Dastarkhwan', 'Aabe Fareed Camp in Chaolistan' donating to the COVID relief fund, blood donation camps, RO water plants for the community and free medical camps, etc. University hosted national and international conferences on science, technology, and religious harmony. Vice Chancellors of different universities and government ministers visited KFUEIT at different events and appreciated the efforts for its rapid developments. A policy to improve good linkages with the industry was implemented. Recently students of KFUEIT got internships in Unilever RYK, PC Bhorbhan, Nestle, JKT Dairies, etc.

No doubt, with all above said achievements KFUEIT is a successful model for all emerging higher education institutions in the country. It is the vision of Vice Chancellor Prof. Dr. Muhammad Suleman Tahir that soon KFUEIT would become one of the leading universities in Pakistan.
